| <b>Description</b>   |                  |                        |            |
| The ontology classes have both an ID and label. If the ID is unique, but the label is not, then the class does not appear in the actor tree. |                  |                        |            |
