Kepler - Bug #5687

investigate alternatives to workflow versioning

08/17/2012 06:48 PM - Daniel Crawl

Status:	New		**Start date:**	08/17/2012
Priority:	Normal		**Due date:**	
Assignee:	Daniel Crawl		**% Done:**	0%

Target version:	2.X.Y		**Spent time:**	0.00 hour
Bugzilla-Id:	5687			

Description

As described in bug #5426, the same workflow can be identified differently when executed on different machines. I fixed this by adding a command-line option to stop changing the LSID. This is sufficient for 2.4, but in the last release meeting we decided for 2.5 to take a closer look at how workflow versioning is done and possibly come up with a better design.
