<b>Description</b>			
<p>After connecting the Workflow Run Manager (2.3.0) to the kepler library and using it to download the attached run kar, it will fail to Force Open it. Nothing seems to happen (I can't see the logs on Mtn Lion-- need to check for errors). Yet if you manually download the run kar from the web, and open it from Kepler's File-&gt; Open, the workflow opens, though the run does not get imported into the WRM as it should.</p> <p>Note we should delete kars like this from the non-dev 'official' library (so things are 'clean' for users), since it was made with an unreleased, unversioned module in the mix:</p> <p>reporting-2.3;keplerio;ssh-2.1;workflow-run-manager-2.3;provenance-2.3;tagging-2.3;workflow-scheduler-gui-1.0;kepler-2.3;outreach-2.2;r-2.3;loader-2.2;actors-2.3;directors-2.0;opendap-2.0;dataturbine-2.2;ecogrid-2.3;authentication-gui-2.2;gui-2.3;module-manager-gui-2.3;authentication-2.3;repository-2.3;job-2.1;io-2.0;data-handling-2.1;sms-2.2;component-library-2.2;util-2.1;event-state-2.1;core-2.3;common-2.3;module-manager-2.3;configuration-manager-2.3;kepler-tasks-2.3;ptolemy-kepler-2.3</p>
