

Kepler - Bug #5724

Display actor's suppressBlankLines parameter not working

10/22/2012 05:24 PM - Derik Barseghian

Status:	New	Start date:	10/22/2012
Priority:	Normal	Due date:	
Assignee:	Derik Barseghian	% Done:	0%

Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	5724		
Description This happens in vergil too. If I create and run an SDF workflow w/ String Constant => Display, w/ Display's suppressBlankLines option turned on, and String Constant's value set to: ----- line1 line3 after blank line2 ----- the resulting display includes the blank line.

Can you upload the model?

#3 - 10/22/2012 05:40 PM - Derik Barseghian

Sure, attached.

#4 - 10/22/2012 05:55 PM - Derik Barseghian

I could file a separate bug for this, and it's a very minor issue, but I also initially thought rowsDisplayed and columnsDisplayed weren't doing anything, because setting them beneath some certain minimum thresholds doesn't affect the popup display size. E.g. using the same attached model, setting rowsDisplayed 1, columnsDisplayed 1, the popup display is not a tiny box.
