<b>Description</b>			
Need to save the SM and ORE documents generated on save and check for them when opening a package. NOTE: current local open shows us only EML objects, not the ORE packages that package them. First need to determine if search can return either/both or if we can deduce the ORE identifier when given the EML identifier

### History

#### #1 - 11/23/2012 11:07 AM - ben leinfelder

First pass will be SM only since there is no mechanism for showing ORE docs to open.

#### #2 - 11/23/2012 01:36 PM - ben leinfelder

Now saving and opening SM from disk (if it is available from previous save)
