EML - Bug #5751

EML stylesheet problem for i18n text

11/27/2012 11:49 PM - MAITA Eiichi

Status:	New		**Start date:**	11/27/2012
Priority:	Normal		**Due date:**

Category:	utilities		**Estimated time:**	0.00 hour
Target version:	Unspecified		**Spent time:**	0.00 hour
Bugzilla-Id:	5751			

Description

eml-resource.xsl:284
<xsl:value-of select="$i18nElement/."/>
is wrong because this command extracts not only
the primary language text but also the additional
translation text.

For extracting only the primary language text,
the command should be modified as the following line:
<xsl:value-of select="$i18nElement/text()"/>
