Yeah, this is the reason i got an error when I called the method :(

There's now a very basic identifier generation method. You can pass it any scheme (ignored) and an optional fragment. If fragment is omitted, the "autogen" fragment is used. They look like this:  
<fragment>.2012113011041728800

This needs more attention.

#### #4 - 02/26/2013 10:17 AM - ben leinfelder

Metacat 2.0.6 now supports UUID (as it should have from the beginning).

#### #5 - 02/26/2013 10:28 AM - ben leinfelder

Current feature set (UUID) is complete. For DOI/EZID support, see related bug: [#5513](#)
