Morpho - Bug #5773

Morpho doesn't generate the system metadata for a data table created by data table wizard.

Description

I created a data package by the data package wizard. At the end, i used the data table wizard to generate a data table. Then I saved the data package.

However, i cant't find any record for the data file identifier in the .systemmetadata.properties file. I can find the record for the eml document identifier in the .systemmetadata.properties.

History

#1 - 01/08/2013 04:33 PM - Jing Tao

In the EntityWizardListener class, I added code to initialize the system metadata base on the eml's system metadata and the data file's size and checksum. The problem was fixed.
