#### Description

I created a data package by the morpho new data package wizard. Then i saved it to the DataONE and got the id tao.284.

I updated the title by morpho and saved it to the DataONE again. This time it gave me the id: tao.2013011416170149711. It is much longer than it was.

Thought I can access it by:

<https://mn-demo-5.test.dataone.org/knb/d1/mn/v1/meta/tao.2013011416170149711>

But the list of object doesn't include it:

<https://mn-demo-5.test.dataone.org/knb/d1/mn/v1/object>

It includes the previous version - tao.284.

I also search the metacat and the result doesn't include the newer version. The metacat search result did show up the previous version tao.284 before I updated it.
