

Kepler - Bug #5781

opening a workflow run leaves temp kar entry in Recent Files menu and changes last directory setting

Bugzilla-Id:	5781		
<b>Description</b> When you open a run from the Workflow Run Manager, behind the scenes a temporary kar is created, opened, and then disposed. This leaves an entry in the new-ish Recent Files menu, and changes the user's 'last directory' setting (the directory opened by default when they next attempt to save). Both of these things are undesirable.  A fix will be committed shortly.
