Category:	eml - general bugs	Estimated time:	0.00 hour
Target version:	EML2.0.0rc1	Spent time:	0.00 hour
Bugzilla-Id:	579		
Description			
The docbook eml-docbook.xml produced by running ant docbook does not validate.			

History

#1 - 08/29/2002 11:44 AM - David Blankman

attached is the error message from xerxes.

#2 - 09/03/2002 11:37 AM - Chad Berkley

fixed the errors that were causing eml-docbook.xml not to validate. there were just a few minor things like missing para tags inside of listitem tags. I wrote a test in SAXValidateTest.java to validate the docbook xml file. just run 'ant docbook test' and it will validate.
