

VegBank - Bug #580

change picklist for classfit in commInterpretation

08/29/2002 02:16 PM - Robert Peet

Status:	Resolved	Start date:	08/29/2002
Priority:	Normal	Due date:	
Assignee:	John Harris	% Done:	0%
Category:	misc	Estimated time:	0.00 hour
Target version:	UnMilestoned	Spent time:	0.00 hour
Bugzilla-Id:	580		

Description

before release we need both VegBranch and VegBank modified to contain the new picklist. Would be much more difficult to retrofit once data submitted.

<values values="Absolutely wrong" />

<values values="Understandable but wrong" />

<values values="Reasonable or acceptable answer" />

<values values="Good answer" />

<values values="Absolutely right" />

(Eventually we want a plantfit field in taxonInterpretation using htese same values, but this can wait.)

History

#1 - 08/29/2002 05:44 PM - Michael Lee

vegBranch version beta 3.0.1 now has the closed list corrected. This will obviously cause problems if users attempt to upload a VegBranch database if the 2 closed lists (VegBank and VegBranch) are not in sync.

#2 - 08/29/2002 06:09 PM - John Harris

This is going to have to wait till november, as there will be no database changes made before november first. Also, the vegbranch plugin will most likely have to be changed too.

#3 - 08/30/2002 11:40 AM - John Harris

added the attributes below to the comm classfit table.
