Description			
Matt updated Xerces.jar file. We need to update Xalan too and to make them compatible.			

History

#1 - 09/03/2002 11:18 AM - Jing Tao

Xalan.jar was updated to 2.4.0 and lots of files were revised too. Currently, morpho workes well in Java 1.4, but not in Java 1.3. This is because a method named selectNodeList in XPathAPI will throw javax.xml.transform.TransformerException (old version would throw SAXException). It seemed this Exception class didn't be defined in Java 1.3. Probably, we can put another jar file which contains this class to fix the problem.

#2 - 09/06/2002 11:25 AM - Jing Tao

I put xercesImpl.jar and xml-apis.jar whcih are shipped with xalan 2.4.0. into morpho lib too. From documentation (xalan_j_2_4_0/docs/readme.html), the xerces version is 2.1.0. The old jar file - xmlParserAPIs.jar was deleted.

Now Xalan, Xerces and xml-apis are compatable and work well in morpho for both java 1.3 and 1.4. (The missed class described above now can be found in xml-apis.jar).
