Description

In SaveQueryCommmand class, it uses a method getNextId() directly for AccessionNumber class which is in datapackage plugin. This is forbidden. We need put the method into DataPackageInterface and DataPackagePlugin class. And then use it by the service provider.

History

#1 - 09/06/2002 04:50 PM - Jing Tao

Method getNextId() was created in both DataPackageInterface and DataPackagePlugin. Now code in query plugin doesn't use the method in AccessionNumber class directly, the method was usr by DataPackageInterface.
