Morpho - Bug #5825

Call CN.setReplicationPolicy() when editing replication policy

01/25/2013 02:12 PM - ben leinfelder

Bugzilla-Id:	5825			

Description

This should act the same as the access policy edits. For network packages, we call the CN.setReplicationPolicy() and only save the SM locally if that was successful. Otherwise we tell the user to wait for the CN to synch with the MN.
If the package is local-only, then we can just save the SM locally.

History

#1 - 01/28/2013 04:55 PM - ben leinfelder

Now calling the CN for changes to the EML ReplicationPolicy. Note that Morpho calls the CN first to retrieve the latest serialVersion of the SM in order to make a successful call, but it does not do any other sort of merging of the two versions (local/cn) of SystemMetadata.ReplicationPolicy.

#2 - 01/28/2013 05:13 PM - ben leinfelder

Now doing the same for data objects.
