

Morpho - Bug #5826

Show identifier conflict prompt when conflict is detected

01/28/2013 10:00 AM - ben leinfelder

Status:	Resolved	Start date:	01/28/2013
Priority:	Normal	Due date:

Target version:	2.1.0	Spent time:	0.00 hour
Bugzilla-Id:	5826		
Description			
I removed this window from the save workflow because it seemed like there was no logical question to ask the user - if you are saving the datapackage it is a new revision, not a new datapackage (you can use the "duplicate" feature if you want a new one). We did away with the notion of the identifiers encoding the revision history, so there's only one thing to do: generate a new identifier for the new revision and use it. The only thing I think we could do is ask what <i>kind</i> of identifier we want to generate (UUID, DOI, ARK...).

I am moving this to 2.1.0. I still can't think of a reason to show the conflict resolution window until we are in a position where we need to generate a specific kind of identifier (DOI, ARK, etc) or if we allow users to name their own identifier.
