Description

When we start morpho, if there is no valid certificate, morpho will show a warning message twice: Peer not be authenticated.

I don't think it is not necessary to show this warning. It may gave a new user a feeling that something is wrong. Actually, this message just indicates that the user hasn't logged in.

History

#1 - 02/01/2013 09:47 AM - ben leinfelder

I was going to remove this call since we are using UUIDs locally and have no need to call the server to check if the last used scope.X identifier.

#2 - 02/01/2013 10:02 AM - ben leinfelder

Removed the setLastID() call because we are using UUIDs and have no need to check the server for the next available scope.X identifier.

#3 - 02/01/2013 10:19 AM - ben leinfelder

I wonder if we should delete the expired client certificate so that calls are made as public rather than just failing with SSL error.

#4 - 02/01/2013 11:51 AM - ben leinfelder

Now getting rid of the client certificate if it is expired.
