Description

Today, i saw some odd entries in the profile/tao/data/.data.proerties:

.systemmetadata.Morpho-1515043114261139655=.systemmetadata/Morpho-1515043114261139655

.systemmetadata.Morpho-1121268751573547011=.systemmetadata/Morpho-1121268751573547011

The format of the file should be pid=filepath and it should not record the any entry in the subdirectory .systemmetadata.

The reason might be i messed up the config.xml and morpho ran the update process from 1.x to 2.0 again. So it build the entries by the file name. We may need to exclude the .systemmetadata directory during the updating.
