

Morpho - Bug #587

Open dialog couldn't search network if relogin

09/10/2002 11:30 AM - Jing Tao

Bugzilla-Id:	587		
Description If you skip login when you launched Morpho, then Open menu will only search data package locally. But after you relogin by click menu login, the open action still only search locally. Actually it should search datapackage in network too.

In OpenFileDialogCommand class, move the code to create ownerquery from constructor to execute method. So the ownerquery will dynamic create base on current Morpho.

If relogin, Morpho will be changed, ownerquery will be changed too. So ownerquery will created to search network.
