

Morpho - Bug #5887

Handle the query result set which contains the revision chains of documents

03/07/2013 03:48 PM - Jing Tao

Target version:	2.0.0	Spent time:	0.00 hour
Bugzilla-Id:	5887		
Description			
<p>Morpho network query now experiences a performance issue because the merge of the network and local search results.</p> <p>During the merge, morpho needs to make lots of calls the DataONE MN to get the revision chains.</p> <p>The proposed solution is to add the revision chain for each eml document to the result set. This can avoid lots of network traffic.</p> <p>So morpho needs to handle the new result set.</p>
