EML - Bug #589

eml-coverage: convert element references to types by defining complex types

09/13/2002 08:59 AM - Chris Jones

Status:	Resolved	**Start date:**	09/13/2002
Priority:	Normal	**Due date:**	
Assignee:	Chris Jones	**% Done:**	0%
Category:	eml - general bugs	**Estimated time:**	0.00 hour
Target version:	EML2.0.0rc2	**Spent time:**	0.00 hour
Bugzilla-Id:	589		

Description

1) The rest of the eml modules use complex types rather than references to create reusable content. coverage needs to do the same.

2) remove originator from taxonomicCoverage/taxonomicSystem/identifierName so that identifierName is of type responsible party.

target this for eml2.0.0rc2

History

#1 - 09/13/2002 03:49 PM - Matt Jones

Will handle in next release.

#2 - 10/01/2002 11:40 PM - Chris Jones

I've converted all of the ref's to complexTypes in coverage, and fixed the identifierName element by simplifying it. This closes this bug.
