Kepler - Bug #5891

Installer acks need to be update for Ptolemy

03/19/2013 07:38 AM - Christopher Brooks

Status:	Resolved		**Start date:**	03/19/2013
Priority:	Normal		**Due date:**	
Assignee:	Derik Barseghian		**% Done:**	0%
Category:	installer		**Estimated time:**	0.00 hour
Target version:	2.4.0		**Spent time:**	0.00 hour
Bugzilla-Id:	5891			

Description

The 2.4Rc3 installer acks for Ptolemy are out of date.
The text should be updated to say:

--start--
Ptolemy receives support in part by the Center for Hybrid and Embedded Software Systems (CHESS) at UC Berkeley, which receives support from the National Science Foundation (NSF awards #0720882 (CSR-EHS: PRET), #1035672 (CPS: Medium: Ptides), and #0931843 (CPS: Large: ActionWebs)), the Naval Research Laboratory (#NOOI73-12-1-G015), the Multiscale Systems Center (MuSyC), one of six research centers funded under the Focus Center Research Program, a Semiconductor Research Corporation program, and the following companies: Bosch, National Instruments, and Toyota. In the past, CHESS has been sponsored by Agilent, DGIST, General Motors, Hewlett Packard, Infineon, and Microsoft.

Ptolemy is also supported in part by the TerraSwarm Research Center, one of six centers supported by the STARnet phase of the Focus Center Research Program (FCRP) a Semiconductor Research Corporation program sponsored by MARCO and DARPA.

Ptolemy is also supported in part by the Naval Research Laboratory project, "Software Producibility for System of Systems," and was accomplished under Cooperative Agreement Number NOOI73-12-1-G015.

--end--

To close this bug, the documentation for how to build a release should
be update to include going to http://ptolemy.eecs.berkeley.edu/sponsors.htm
to update the list of Ptolemy sponsors.

History

#1 - 03/20/2013 08:52 AM - Christopher Brooks

I updated kepler/common/configs/ptolemy/configs/kepler/doc-index.htm in the trunk to include the Ptolemy ack.

I updated https://kepler-project.org/developers/reference/kepler-installer-checklist

To close this bug, the release branch would still need to be updated.

#2 - 03/20/2013 10:44 AM - Daniel Crawl

I updated:

build-area-2.4/resources/installer/windows/README.ftl
common-2.4/configs/ptolemy/configs/kepler/doc-index.htm

Chapter 1 of the User Manual:
https://code.kepler-project.org/code/kepler-docs/trunk/outreach/documentation/working/UserManual/1.0ChapterOne.doc
https://code.kepler-project.org/code/kepler-docs/trunk/outreach/documentation/working/UserManual/KeplerUserManual-2.4.doc
https://code.kepler-project.org/code/kepler-docs/trunk/outreach/documentation/working/UserManual/KeplerUserManual-2.4.pdf
common-2.4/configs/ptolemy/configs/kepler/UserManual.pdf

All changes on the 2.4 branch will get merged to the trunk after the release.

I put the above locations along with the URL for Ptolemy sponsors on the Kepler Release Process page:

https://kepler-project.org/developers/teams/build/kepler-release-process

I did not know about the Kepler Installer Checklist page; it should be merged with the Kepler Release Process page.
