

Metacat - Task #5918

Feature # 5810 (Closed): Implement SOLR-based search

Separate unit tests from integration tests

04/18/2013 05:18 PM - ben leinfelder

| Description | | | |
| Since some of the metacat-index tests currently require Metacat be running in order to succeed, we need to skip them when building metacat-index during the Metacat build. We should only be running unit tests during the mvn package command in metacat-index and we can run the integration tests later using "mvn verify" (not part of the build process itself) | | | |
