Metacat - Task #5930

Feature # 5810 (Closed): Implement SOLR-based search

Add a configuration property to turn on/off the indexing processes (SOLR indexing)

04/30/2013 03:24 PM - Jing Tao

Status:	Closed		Start date:	04/30/2013
Priority:	Normal		Due date:

Target version:	2.1.0		Spent time:	0.00 hour

Description
So that Metacat installations can decide which (or both) they want to use. The proposed the property is: dbquery.enabledEngines=pathquery,solr The default value is both on.

If we removed the "solr" from the engine list, metacat-index will not build index anymore. And the solr query will be disabled as well.

The pathquery hasn't been done yet. Here is the idea: if we turn the "pathquery" off, the building index for both xml_index and xml_path_index will be off. But we need to make sure this will not break the metacat.
