History

#1 - 07/25/2013 08:40 AM - ben leinfelder

- Status changed from New to In Progress
- Assignee set to ben leinfelder

Final tweaks needed include:

~~Making sure any links inside the metadata detail view do not jump us out of the metacatui application (EML attribute details especially).~~

Add ORE id so that packages can be downloaded from the metadata view, not just the search results

#2 - 07/25/2013 05:41 PM - ben leinfelder

Switched to the "printall" display module so there are no links to view the entity/attribute details. This is a long page - but we have plans to include more widgets for navigating the metadata sections and tables

#3 - 07/26/2013 12:11 PM - ben leinfelder

- Status changed from In Progress to Closed

Felling good about this one now! the ORE ids are used only if we can locate a resourceMap pid. This is done with an ajax call to the query service since that is the only place we can find the resourceMap for any given pid.
