### Description

First pass will focus on existing information in the object discovery index - size and type of objects, the rates at which they were added and only an aggregate number for the reads/downloads.

This should re-use essentially all the widgets on the "user statistics" page since the only difference will be the underlying query that gathers the information from the index.

### History

**#1 - 12/09/2013 04:14 PM - Lauren Walker**

*- Target version set to 1.5.0*

**#2 - 03/03/2014 07:18 AM - ben leinfelder**

*- Description updated*

*- Status changed from New to In Progress*

*- Assignee set to Lauren Walker*

**#3 - 03/24/2014 04:21 PM - Lauren Walker**

*- Status changed from In Progress to Resolved*

We have a time series chart for uploads over time, two donut charts to describe format types, and a bar chart to describe data coverage. The only thing left to do is transition the CSS to the other themes.
