Description

If a user selects a set of cell sin the dataview table, then right-clicks on the selection to get a popup menu (e.g. if they are planning to "copy" the selection) the selection is cleared, and only the cell immediately beneath the mouse cursor is selected.

I think mouse listener just needs to be changed so it doesn't start a selection when right button clicked - only when left button clicked

History

#1 - 10/01/2002 11:49 AM - Dan Higgins

mouse listener changed to not change the current selection

#2 - 03/27/2013 02:14 PM - Redmine Admin
