Description

Hi everyone,

I have saved a data package and completed all fields. I have tried saving it to the network (while logged in), and synchronizing, and both give me multiple errors, starting with this one:

Some problem with saving data files has occurred! `<?xml version = "1.0"?> <error> Permission denied for upload </error>`

I am sure this is some simple thing that I am not understanding as a new user, but I would certainly appreciate some guidance. Thanks!
