

MetacatUI - Bug #6055

Pressing back button in browser does not go back to previous search results page.

Using new routes so that browser "knows" where we are in the application.

- Status changed from In Progress to Feedback

Team: please take a look at this re-implementation of paging and let me know if you see any issues. Thanks!

#3 - 08/27/2013 04:52 PM - ben leinfelder

The search term filter is always applied during paging - even when you hit the back button. Hopefully there is an intelligent way to do this. One option is to drive the search entirely with URLs, but that might get cumbersome.

#4 - 09/12/2013 09:59 AM - ben leinfelder

- Status changed from Feedback to Closed

Works for the time being - will be updated when more advanced search options are included
