

MetacatUI - Feature #6073

Show "has data" icon (files? folder?) in search results when there is data associated with the metadata record

- Assignee set to Lauren Walker

We already change the button in the search results when there is a datapackage (resourceMap) for the record so including a file folder (or something) icon on that row should be straightforward. Mark@NCEAS, Gastil@MCR, and Lizzie@RPG have all mentioned this feature in the past week...

Should be included in all themes (default, knb, gulfwatch)

#2 - 09/10/2013 11:43 AM - Lauren Walker

- Status changed from New to Closed

I included a folder icon in the resultsItem template with a tooltip hover-over in the DataCatalogView. Is working in all themes.
