

Metacat - Feature #6092

Science Metadata DOIs should point to "view" landing page

09/16/2013 11:14 AM - ben leinfelder

Description			
We'll use a configurable template for the URI in metacat.properties that will allow us flexibility in determining what the "landing page" for the DOI should be. Will have a property for metadata and for data, defaulting to the /object URI.

- Status changed from New to Closed

Added two optional entries in metacat.properties for including a template for the view landing page:

```
# optional path for target. do not include hostname here. <IDENTIFIER> is replaced with real value
guid.ezid.uritemplate.metadata=/metacatui/#view/<IDENTIFIER>
#guid.ezid.uritemplate.data=
```
