Description

WHen I try to register with an account that has similar info as an existing one (email, last name etc) on dev2.nceas.ucsb.edu I see this in the apache error.log:

```
[Tue Oct 01 17:05:36 2013] [error] [client 128.111.220.249] malformed header from script. Bad head
er=    <h3>Similar accounts exist: ldapweb.cgi, referer: http://dev2.nceas.ucsb.edu/
```

and the response is an internal server error page.

History

#1 - 10/01/2013 05:59 PM - Jing Tao

i installed a new metacat with the trunk code. The ldap server points to ldap-dev. It works great with similar accounts presenting.

I will install a new metacat in dev2 to see what happens.

#2 - 10/02/2013 10:50 AM - Jing Tao

- Status changed from New to Resolved

- translation missing: en.field_remaining_hours set to 0.0

the new installation fixed the issue.
