History

#1 - 10/07/2013 01:02 PM - Lauren Walker

- Status changed from New to Resolved

IE handles stylesheets that are added dynamically to the DOM differently. So the metacatui CSS added dynamically was not cascading/overriding Bootstrap and other stylesheets in IE. I changed the AppHead and AppView to load the CSS along with the other stylesheets instead of adding via JS in loader.js.

#2 - 10/09/2013 08:31 AM - Lauren Walker

- Status changed from Resolved to In Progress

Again, Bootstrap is overriding CSS in the Gulfwatch theme in IE 9.

#3 - 10/09/2013 08:44 AM - ben leinfelder

- Target version set to 190

Assigning to 1.1.1 patch - should also be included in master branch for future releases.

#4 - 10/09/2013 09:01 AM - Lauren Walker

- Status changed from In Progress to Resolved

- Target version deleted (190)

Updated the Metacatui1.1 and Metacatui1.2/master branches with this CSS change.
