

MetacatUI - Feature #6131

Display suggestions for search terms when user starts typing a search entry

10/07/2013 05:03 PM - Lauren Walker

Status:	Resolved	Start date:	10/07/2013
Priority:	Normal	Due date:	
Assignee:	Lauren Walker	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	1.2.0	Spent time:	0.00 hour
Bugzilla-Id:			
Description			
Example: A user starts typing a filter term in an input box and is given a list of suggestions to complete the word or phrase based on actual keywords in the data. A number would be shown next to each suggestion that reports the number of search results for that given phrase.			

History

#1 - 10/09/2013 09:33 AM - Lauren Walker

- Target version set to 1.2.0

#2 - 10/17/2013 10:05 AM - Lauren Walker

- Status changed from New to In Progress

I've got a beta version working for now, will be expanding upon it to show the faceted search counts for each suggestion

#3 - 10/25/2013 12:54 PM - ben leinfelder

Note: I also added this to the Taxon input field, but without frequency counts either.

#4 - 10/25/2013 03:33 PM - Lauren Walker

- Subject changed from *Display suggestions for search terms when user starts typing a search entry* to *Display suggestions for search terms when user starts typing a search entry*

- Status changed from In Progress to Resolved
