

Metacat - Bug #6137

Add a new action reindexall to reindex all the solr index

10/09/2013 04:14 PM - Jing Tao

Status:	Resolved	Start date:	10/09/2013

Target version:	2.3.0	Spent time:	0.00 hour
Bugzilla-Id:			
Description			
<p>Currently we have an action named reindex. If the action has a parameter pid, it will reindex the solr index of the specified pids. If there is no pid, it will reindex all solr index.</p> <p>Even though only the administrator has the privilege, it is still easy to reindex all solr index accidentally, which sometimes is very expensive. We should remove the "index all feature" from reindex and add a explicit action reindexall.</p>			

History

I think this would be redundant and it would be better to just leave it as is, and have administrators use care. They could just as easily call reindexall as reindex inadvertently, so there would be minimal gain.

#2 - 10/09/2013 10:03 PM - Jing Tao

I read this message after i committed the change :)

I still think we should give an expensive process a dedicated action to avoid any accident.

#3 - 10/10/2013 09:37 AM - Jing Tao

- Status changed from New to Resolved

Just leave as it is.

#4 - 10/10/2013 12:12 PM - ben leinfelder

- Target version changed from 2.2.1 to 2.3.0
