Target version:	1.7.0	Spent time:	0.00 hour
Description			
Matt and I were discussing that in the future we would want MetacatUI to use responsive design throughout so that it can be used on mobile devices. We would need to test on different mobile (virtual?) devices of various sizes and platforms.

I paid attention to this in the new SNAP theme so that it looks fairly good on smaller browser widths.

#2 - 03/20/2015 09:13 AM - Lauren Walker

- Target version set to 1.7.0

#3 - 06/01/2015 09:27 AM - Lauren Walker

- Status changed from New to Resolved

Its not totally perfect but everything is readable and accessible on mobile devices now
