

MetacatUI - Bug #6190

Changing the header type in the views replaces all other classes instead of adding to the list of classes

10/31/2013 09:53 AM - Lauren Walker

Description			
So any classes that are set in the app.html template are lost when the header type is defined in the view.

- Status changed from New to Resolved

Change the way the NavBarView changes the header type - there is now a default (default) and alternative (alt) headerType with associated CSS class. The headerType can be changed upon rendering any view. The NavBarView will listen to this change and toggle the navbar CSS class appropriately.
