

MetacatUI - Task #6203

Story # 6204 (Resolved): Add spatial search filter

Create text input for spatial search and implement with Google Maps Geocoder service

11/13/2013 12:21 PM - Lauren Walker

Status:	Rejected	Start date:	11/13/2013
Priority:	Normal	Due date:	
Assignee:	Lauren Walker	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	1.3.0	Spent time:	0.00 hour
Description			
Allow spatial search by text such as place name or address. Use the Geocoder service from the Google Maps API to match that string to a Latitude Longitude pair. Zoom in to that Lat/Long location on the map and add a search filter.

- Parent task set to #6204

#2 - 11/25/2013 11:05 AM - Lauren Walker

- translation missing: en.field_remaining_hours set to 0.0

- Status changed from New to Rejected

There is a text spatial search that queries the Geographic Description field of the metadata. We are bypassing having a text search just for the map.
