

EML - Bug #629

unit conversion coefficients need checking

10/14/2002 01:52 PM - Chad Berkley

Status:	Resolved	Start date:	10/14/2002
Priority:	Immediate	Due date:

Target version:	EML2.0.0rc3	Spent time:	0.00 hour
Bugzilla-Id:	629		
Description The multipliers in the eml-unitDictionary.xml file need to be checked for each unit in the file. There is also one unit, nanomolesPerGramPerSecond, that does not have a multiplier but needs to have one.			

History

#1 - 10/25/2002 11:11 AM - Matt Jones

Tim checked these. There are some problems. See Tim's email for details.
Needs to be fixed for the EML 2 release.

#2 - 10/25/2002 11:17 AM - Matt Jones

Also, need to resolve issues with:

- 1) additional units that should be added
- 2) datetime values
- 3) non-linear unit conversions (e.g., log conversions for pH)
- 4) ability to extend the unit dictionary (ie, is it a part of the 'definition' of EML)? Can we upgrade the dictionary between EML releases legitimately?

#3 - 11/05/2002 09:21 AM - Matt Jones

Checked, revised, and completed.
