

Metacat - Bug #63

methods in MetaCatServlet should be private not protected

08/18/2000 10:26 AM - Matt Jones

Status:	Resolved	Start date:	08/18/2000
Priority:	Normal	Due date:

Target version:	Beta1 (AnnMeet2000)	Spent time:	0.00 hour
Bugzilla-Id:	63		

Description

Many of the helper methods in MetaCatServlet have been changed to "protected" from their original "private" state. Most of these should be changed back to "private" because they are not intended to be overridden by subclasses (for example, handleGetOrPost). A couple should remain "protected", but only when the method is specifically intended to be overridden (e.g., decodeMouseAction).

History

#1 - 08/21/2000 04:29 PM - Matt Jones

reassigned to berkley (I think he already handled this bug.)

#2 - 08/22/2000 02:34 PM - Chad Berkley

Extraneous methods were changed, the protected, overridable methods are:

decodeMouseAction
handleSQuery
handleQuery
transformQuery
transformResultSet
createResultDocument
