Bugzilla-Id:	631		

Description

Some text edit boxes are missing when the InstallAnywhere version of Morpho 1.2beta is run. (Christy is only one with the version, currently.) Problem disappears when installer version is launched using morpho.bat, but occurs when morpho-exec.exe is used to launch morpho!

History

#1 - 10/16/2002 03:17 PM - Dan Higgins

Problem with installer was traced to catalog files (i.e. catalog director with dtlds) existing both in installed lib directory and inside the morpho-config.jar file. The catalog directory was removed and the problem disappeared.

I DO NOT UNDERSTAND why this caused a problem for the InstallAnywhere exe launcher and not for the .bat file!
