<b>Description</b>			

#### History

##### #1 - 01/06/2014 11:44 AM - Lauren Walker

- Subject changed from *Skip over attributes that don't exist in an EML file rather than print a blank node in eml-attribute.xsl* to *Print "N/A" or similar when EML fields don't exist rather than print a blank node*

For example, data attributes that are non-existent in an EML file will still be printed by eml-attributes.xsl but will say "None provided" or something similar.
