

## MetacatUI - Bug #6418

### EML documentation has some CSS layout issues (knb theme)

02/14/2014 11:10 AM - ben leinfelder

<b>Description</b> Looking at the EML docs via the Metacat UI, there are still headers that are placed oddly. I think this stems from padding/margin/top properties that are being used to make scrolling to anchors in other pages work with our header height. Unfortunately, it pushes these headers to the wrong location -- hiding content and making it hard to tell which header goes with which item in the table.  <a href="https://knb.ecoinformatics.org/m/#external/emlparser/docs/eml-2.1.1/.eml-coverage.html">https://knb.ecoinformatics.org/m/#external/emlparser/docs/eml-2.1.1/.eml-coverage.html</a>

#### History

**#1 - 02/14/2014 11:12 AM - ben leinfelder**

- Description updated

- Assignee set to Lauren Walker

**#2 - 02/18/2014 04:36 PM - Lauren Walker**

I edited the emlparser documentation a while ago to fix this issue. We may want to update the emlparser webapp on the KNB

**#3 - 02/26/2014 11:02 AM - Lauren Walker**

- Status changed from New to Resolved

**#4 - 02/26/2014 10:39 PM - ben leinfelder**

I deployed this on KNB just now and the headers are where I would expect them to be. Using EMLPARSER\_2\_1\_1\_UPDATE\_3 tag to build the emlparser.war
