

Kepler - Bug #6453

Dock icon changes to coffee cup

03/11/2014 02:29 PM - Rich Morin

Status:	New	Start date:	03/11/2014

Description			
As Kepler starts up, the normal (Mac OS X) Dock icon is replaced by a (Java) coffee cup. This is unexpected, unhelpful, and possibly confusing.

What version of Kepler, OS X, and Java are you using?

#2 - 03/12/2014 12:00 AM - Rich Morin

I'm running Kepler 2.4 on Mac OS X 10.7.5 on an 8-core Mac Pro.
Not sure about the Java version, but this suggests 1.6 to me:

```
$ javac -version
javac 1.6.0_65
```
