Description

Corinna (at GLEON) installed Metacat 2.4.1 and noticed that the search result header covers the first record. Indeed, it is squished in her screenshot.

```
corinna: I am using firefox 27.0.1
corinna: windows 7 enterprise 64
corinna: it's the same in chrome
```

Just a few CSS rules needed to be changed to give the "Sort by" more width so the height of the header didn't bleed into the results
