| Sometimes when the profile view loads the upload chart is positioned to far up the page - giving it the position:relative CSS attributes makes it visible. |               |                        |            |

I haven't had this happen to me locally and I've made a lot of CSS and markup changes since this ticket was created. Please let me know if anyone is experiencing this.
