

Metacat - Feature #6512

Add brief explanation to Metacat docs for using custom map markers in a custom theme

04/14/2014 02:01 PM - Lauren Walker

Status:	Rejected	Start date:	04/14/2014
Priority:	Normal	Due date:	
Assignee:	Lauren Walker	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Bugzilla-Id:			
Description			
Since I've implemented a new way to use custom map marker and cluster images for each theme without overriding the DataCatalogView.			

History

#1 - 04/24/2014 11:50 AM - Lauren Walker

- Project changed from MetacatUI to Metacat
- Target version deleted (1.6.0)

Technically this is a part of the metacat project

#2 - 10/22/2015 11:50 AM - Lauren Walker

- Status changed from New to Rejected

This will be part of the MetacatUI docs that I will be creating for the 1.8.1 or 1.9.0 release...
