<b>Description</b>			
In <a href="https://code.ecoinformatics.org/code/seek/trunk/projects/ecogrid/src/org/ecoinformatics/ecogrid/metacat/auth/MetacatAuthImpl.java">https://code.ecoinformatics.org/code/seek/trunk/projects/ecogrid/src/org/ecoinformatics/ecogrid/metacat/auth/MetacatAuthImpl.java</a> class, it only accesses metacat through a http connection. If metacat doesn't have one, the login will fail.

Using the SystemUtil.getMetacatServletUrl to replace the hard-coded "http" in authentication, put, authenticatedQuery and identifier services. It worked right now.
