Description			
<p>When I tested the metacat replication, I got the error in the remote server when i used morpho 1.10 or online registry to insert a package with data file to the local metacat:</p>			
<pre>metacat-index 20140417-15:11:18: [ERROR]: Solr index doesn't have the information about the id tao.13007.1 which is a component in the resource map resourceMap_tao.13007.1. <p>But the in the local host, the solr index worked fine.</p>

- Subject changed from Remote server indexing the resource map prior to metadata document to Metacat indexing the resource map prior to metadata document

Actually, the localhost has the same error:

```
[ERROR]: Solr index doesn't have the information about the id tao.13010.1 which is a component in the resource map resourceMap_tao.13010.1. Metacat-Index can't process the resource map prior to its components. I also saw the error when i used morpho 1.10 to insert a package with data:

```
[ERROR]: org.apache.solr.common.SolrException: org.apache.lucene.queryParser.ParseException: Cannot parse 'resourceMap:*+id:"tao.13010.1"':  
Encountered " ":"": "" at line 1, column 16.

#3 - 04/22/2014 03:39 PM - ben leinfelder

- Status changed from New to In Progress

- Assignee set to ben leinfelder

- Target version set to 2.5.0

Now we will submit the ORE for indexing after we are sure the metadata document has been indexed.

#4 - 04/23/2014 10:45 AM - ben leinfelder

- Status changed from In Progress to Closed

Tested package upload from Morpho and the resourceMap was successfully indexed.

#5 - 11/13/2014 03:24 PM - ben leinfelder

- *Target version changed from 2.5.0 to 2.4.2*
