

Morpho - Bug #6583

Morpho doesn't enforce the users to input values of both the code and codeExplanation for the missingValueCode element

08/11/2014 11:38 AM - Jing Tao

| Bugzilla-Id:   |          |                 |            |
| Description  |          |                 |            |
| EML specification requires the both code and codeExplanation elements for the missingValueCode element. However, in the attribute editing panel, a user can only input the value for the codeExplanation without the value for the code in Morpho. This cause to create an invalid eml document. |          |                 |            |
| We should enforce users to input both values.  |          |                 |            |

History

#1 - 08/11/2014 11:38 AM - Jing Tao

- Assignee set to Jing Tao

#2 - 08/12/2014 04:05 PM - Jing Tao

- Status changed from New to Resolved

- Target version set to 1.10.2

In the AttributePage.java, the enforcement code was added in the onAdvance method. Users should fill both of them if they filled one of them.

The code was committed to the 1.10 branch and the trunk.
